CAREER OBJECTIVE

Forward-thinking B.Tech Artificial Intelligence and Data Science student with hands-on expertise in modern programming, machine learning, and web technologies. Passionate about building intelligent AI agents and scalable AI-powered applications. Seeking a role where I can apply strong analytical and problem-solving skills to design, develop, and deploy AI models and agent-based systems — while collaborating with cross-functional engineering teams to deliver measurable business impact and grow into a versatile AI/Full-Stack engineer.

EDUCATION

Rathinam Technical Campus – Coimbatore

Bachelor of Technology (B.Tech) in Artificial Intelligence and Data Science

CGPA: 9.19

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C
- **Databases:** SQL (postgresql and microsoft server sql)
- **Tools & Platforms:** Git & GitHub | VS Code | Jupyter Notebook | Google Colab | REST APIs | Power BI | Canva & Figma
- **AI- Assisted Development :** Vibe coding| GitHub copilot| Antigravity | Cursor | Claude | Z.ai

PROJECTS

AETHER: Full-stack Deep Learning Mission Control System for real-time aerospace telemetry monitoring. Simulates live spacecraft data streams and uses LSTM Neural Networks to predict engine failures before they occur. (AWS S3, tensorflow/keras, streamlite)

Intelligence Document Summarizer: Developed a Python tool using NLTK and Sumy to generate concise document summaries, offering practical NLP experience and scalable potential.

Mini AI Voice Agent: Created a functional AI voice agent with Python and LiveKit, providing an interactive beginner- friendly introduction to real-time AI applications.

SKILLS

Machine Learning Basics | Linear Regression | Classification | Data Preprocessing | Model Training & Testing | Scikit-learn | Prompt Engineering | LLM API Integration | OpenAI API | RAG | AI Chatbot Development | Pandas | NumPy | Matplotlib | LangChain | ChromaDB

CERTIFICATIONS

- **Google Prompt Essential** - Coursera
- **UI/UX Design** - Workshop
- **Innovation Through Design** - Coursera
- **Building RAG Apps Using MongoDB** - MongoDB
- **Building AI-Powered Search with MongoDB Vector Search** - MongoDB
