CAREER OBJECTIVE

Forward-thinking B.Tech Artificial Intelligence and Data Science student with hands-on experience in machine learning, NLP, and AI-based applications. Skilled in building intelligent systems using Python, Scikit-learn, and modern LLM frameworks such as RAG and LangChain. Seeking an entry-level role to apply analytical and problem-solving skills in developing scalable AI solutions.

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence and Data Science
Rathinam Technical Campus, Coimbatore Current CGPA: 9.0

TECHNICAL SKILLS

Programming Languages: Python, Java, C

Machine Learning: Supervised Learning (Linear Regression, Logistic Regression, Classification), Model Training & Evaluation, Data Preprocessing & Feature Engineering

Libraries & Frameworks: Scikit-learn, Pandas, NumPy, Matplotlib, TensorFlow, Keras (Basic)

AI / LLM: RAG, LangChain, OpenAI API

Tools: Git, GitHub, VS Code, Jupyter Notebook

Databases: PostgreSQL, SQL Server

PROJECTS

AETHER: Deep Learning-Based Aerospace Monitoring System, Developed a full-stack AI system to simulate real-time spacecraft telemetry data, Implemented LSTM model using TensorFlow/Keras for failure prediction and Integrated AWS S3 for storage and Streamlit for visualization dashboard.

Intelligent Document Summarizer: Built an NLP-based summarization tool using Python, NLTK, and Sumy, Extracts key insights from large documents efficiently.

Mini AI Voice Agent: Developed a real-time voice assistant using Python and LiveKit and Integrated speech-to-text and text-to-speech pipelines.

CERTIFICATIONS

- Google Prompt Engineering Essentials – Coursera
- Innovation Through Design – Coursera
- Building RAG Applications Using MongoDB
- AI-Powered Search with MongoDB Vector Search
- UI/UX Design Workshop

ACHIEVEMENTS

- Built multiple AI-based personal projects demonstrating real-world applications
- Actively learning AI/ML deployment and cloud technologies
- Strong interest in AI agents and full-stack AI development
